

# GameOn

## Privacy Policy

Effective date: August 11, 2026

This Privacy Policy describes what personal information GameOn collects through the app (account, profile, match, location, and usage data), how we use it to power matchmaking, court suggestions, and notifications, and the choices you have over it.

### 1. Who we are

GameOn ("we", "us") operates a tennis matchmaking platform that connects players by skill rating (Elo) and location, and helps them find courts to play at. This policy explains what data we collect through the GameOn app and why.

### 2. Information we collect

**Account information.** When you sign up, our authentication provider, Clerk, collects your name, email address, and password/social-login credentials. We never see or store your password ourselves.

**Profile and match data.** Your Elo rating, match history, wins/losses, availability status, and any court or opponent preferences you set.

**Location data.** The zip code (or, if you enable it, precise location) you provide is converted to map coordinates (geocoded) using the Google Maps/Places API, so we can show nearby players and courts. On the map view, other players' locations are shown at neighborhood-level only, never your exact address.

**Usage data.** We use PostHog to record product-analytics events such as match requests, acceptances, profile views, and session activity, so we can understand how the app is used and fix problems.

**Communications.** If we send you a notification or transactional email (match requests, weekly rating summary, reminders), that email is delivered through Resend.

### 3. How we use your information

- To operate matchmaking: finding players near you within your Elo range.
- To show you and suggest nearby public tennis courts.
- To send match, chat, and rating-related notifications in real time.
- To send email notifications you're eligible for (you can opt out of non-essential ones).
- To understand product usage and improve the app (aggregated analytics, not sold to advertisers).
- To keep the platform secure and prevent abuse.

### 4. Who we share data with

We share data only with the service providers that power the app, each acting on our behalf: Clerk (authentication), Google (Maps/Places geocoding and court data), PostHog (product analytics), Resend (transactional email), and our database/hosting infrastructure. We do not sell your personal information to

third parties or use it for third-party advertising.

We may disclose information if required by law, or to protect the rights, safety, or property of GameOn, our users, or the public.

## 5. Your choices

- You can edit or delete your profile information at any time from your account settings.
- You can turn off precise location sharing and use zip-code-level matching instead.
- You can opt out of non-essential email notifications from your notification preferences.
- You can request a copy of your data or ask us to delete your account by contacting us (see Section 8).

## 6. Data retention

We keep account and match data for as long as your account is active, so match history and rating continuity work correctly. If you delete your account, we delete or anonymize your personal data within a reasonable period, except where we're required to keep records for legal or security reasons.

## 7. Children's privacy

GameOn is not directed at children under 13, and we do not knowingly collect personal information from children under 13. If you believe a child has created an account, contact us and we will remove it.

## 8. Contact us

Questions about this policy or your data can be reached at **andrew.johnson197623@gmail.com** or by phone at **(972) 292-0634**.

## 9. Changes to this policy

We may update this policy as GameOn's features change. We'll update the effective date above and, for significant changes, notify you in-app.

This document is a template provided for a student/portfolio project and is not legal advice. Before using GameOn with real users, have it reviewed by a lawyer familiar with your jurisdiction and with applicable law (e.g. GDPR, CCPA/CPRA, COPPA) for your user base.
